pfSense - Feature #10055

Update firewall_nat_npt.php to include a link to The pfSense Book, rather than the community maintained documentation

12/28/2019 10:36 PM - Anonymous

Description

Presently, at firewall_nat_npt.php, there is a help button (circle with question mark inside of it) that links to the public, community maintained documentation. However, the pfSense Book documentation is more informative and also publicly available.

Link currently points to: https://docs.netgate.com/pfsense/en/latest/nat/using-ipv6-network-prefix-translation-npt.html

Link should point to: https://docs.netgate.com/pfsense/en/latest/book/nat/ipv6-network-prefix-translation-npt.html

For example, the pfSense book includes information and screenshot examples that the current link does not.
