

pfSense - Bug #10161

Improve renaming of pfSense in non-pfSense builds.

01/04/2020 12:53 PM - Ronald Schellberg

Status:	Resolved	Start date:	01/04/2020
Priority:	Very Low	Due date:	
Assignee:		% Done:	0%
Category:	Build / Release	Estimated time:	0.00 hour
Target version:		Affected Architecture:	
Affected Version:	All		

Description

As discussed in "Minor issues with "non-pfSense" rename logic", having to rename pfSense files in non-netgate builds is not as smooth as it could be. Manual editing of a few files is necessary during these builds.

Making a few changes in builder_common.sh and in sysutils/pfsense-repo/makefile help avoid the manual editing.
