[https://forum.netgate.com/topic/151725/freeradius-ipv6-framed-ip-issue-with-2-4-5:](https://forum.netgate.com/topic/151725/freeradius-ipv6-framed-ip-issue-with-2-4-5)

Thought I'd have a play with framed IPv6 now im running 2.4.5.

```
/usr/local/etc/raddb/mods-config/files/authorize[31]: Parse error (reply) for entry andy-iphone:  
Failed resolving "64" to IPv6 address: hostname nor servname provided, or not known
```

Correct format is Prefix/Prefix-length, i.e. 2001:db8:abab::64

Fix: <https://github.com/pfsense/FreeBSD-ports/pull/810>
