Description

A described in Ticket #1037 for TLS mode the ca certificate should be specified before attempting a connect.

There should be a place during authentication server configuration where a selection of the ca to use in case of TLS. And in the authentication code make sure its used before doing any action.

Associated revisions

Revision c5ff4e16 - 07/16/2006 05:30 PM - Scott Ullrich

Do not attempt to start_service() twice. This is already handled and can lead to ticket #1044
