

pfSense - Bug #1056

DHCP logs are empty since isc-dhcp-server upgrade

Description

Since we upgraded to isc-dhcp41-server a few weeks ago, the DHCP logs tab is empty.

The config directives are still the same for logging, and syslogd is still setup to look at the proper syslog facility, yet the logs are blank.

Confirming, I now have logs showing DHCP requests and replies (as well as when the leases are saved to a file), in the snapshot from Wed Dec 1 17:21:34 EST 2010 (i386), where it used to be blank.
