

pfSense - Bug #10675

DHCPv6 config not all directives start on a new line as expected

06/18/2020 03:35 PM - Jim Pingle

Status:	Feedback	Start date:	06/18/2020
Priority:	Normal	Due date:	
Assignee:	Jim Pingle	% Done:	0%
Category:	DHCP Server	Estimated time:	0.00 hour
Target version:	2.5.0		
Affected Version:		Affected Architecture:	All

Description

In the DHCPv6 config, "prefix6" is not starting on its own new line. Probably the line before is missing a \n at the end of the string it builds.

```
subnet6 2001:db8::/64 {
    range6 2001:db8::FFFF:0000 2001:db8::FFFF:FFFF;
    do-forward-updates false;
    option dhcp6.name-servers 2001:db8::1;    prefix6 2001:db8:1:E000:: 2001:db8:1:EF00:: /60;
}
```
