

pfSense - Bug #10758

Group Authentication is never used

07/11/2020 03:48 AM - Viktor Gurov

Status:	Closed	Start date:	07/11/2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	IPsec	Estimated time:	0.00 hour
Target version:		Affected Version:	2.4.5-p1
Plus Target Version:		Affected Architecture:	
Release Notes:			
Description			
IPsec / Mobile Clients -> 'Group Authentication' is never used on the 2.4.5-p1 or 2.5 pfSense:			
<pre># grep group_source -r / /etc/inc/upgrade_config.inc: \$config['ipsec']['client']['group_source'] = 'system'; /usr/local/www/vpn_ipsec_mobile.php: \$pconfig['group_source'] = \$a_client['group_source']; /usr/local/www/vpn_ipsec_mobile.php: \$reqdfields = explode(" ", "user_source group_source"); /usr/local/www/vpn_ipsec_mobile.php: \$client['group_source'] = \$pconfig['group_source']; /usr/local/www/vpn_ipsec_mobile.php: 'group_source', /usr/local/www/vpn_ipsec_mobile.php: \$pconfig['group_source'],</pre>			
Legacy feature?			

History

#1 - 07/13/2020 08:29 AM - Jim Pingle

If I remember right, it was used with the old Racoon IPsec implementation and may have been left out when we moved to strongSwan for some reason or another.

It looks like the PR for [#10748](#) might start using this again so is this issue even necessary to keep? It could be closed in favor of that one, or the PR could be referenced here and that one closed.

#2 - 08/02/2020 04:01 AM - Viktor Gurov

- Status changed from New to Closed
