#### Description

Hi, after installation of HAVP, when still on the package installation page, click the pfSense logo and an immediate deinstallation followed by a reinstall is initiated.

#### History

##### #1 - 12/12/2010 05:20 PM - Lars Hupfeldt Nielsen

That should say 'logo' but I don't think I can edit the title.

##### #2 - 12/12/2010 05:44 PM - Jim Pingle

- Subject changed from *Clicking pfSense logi start deinstall/reinstall og HAVP package* to *Clicking pfSense logo start deinstall/reinstall of HAVP package*

If you did this after a firmware update, the flag file that tells the GUI it needs to reinstall all packages may still have been there. It's not necessarily a HAVP bug, it would happen for any package if that's the case.

When you visit the main GUI index page after a firmware update, it will reinstall all packages. That's expected behavior.

##### #3 - 12/13/2010 02:44 AM - Serg Dvoriancev

It is possible to repeat again?
