<b>Target version:</b>	2.5.0	<b>Affected Version:</b>	2.5.0
<b>Plus Target Version:</b>		<b>Affected</b>	All
<b>Release Notes:</b>	Default	<b>Architecture:</b>	

#### Description

In very recent snapshots I have big problems which seems lagg related. May be related to freebsd issue [https://bugs.freebsd.org/bugzilla/show\\_bug.cgi?id=240609](https://bugs.freebsd.org/bugzilla/show_bug.cgi?id=240609)

Please have a look at the attached crash dump

#### History

##### #1 - 10/05/2020 09:15 AM - Jim Pingle

- Priority changed from High to Normal

That's due to INVARIANTS in the kernel which is only a temporary measure to gather information while other issues are being debugged. It's going to be removed shortly.

##### #2 - 10/05/2020 09:58 AM - Jim Pingle

- Status changed from New to Feedback

- Affected Version changed from 2.5.x to 2.5.0

INVARIANTS has been removed from the kernel, try the next new snapshot.

##### #3 - 10/05/2020 01:41 PM - Louis van Breda

A few minutes ago I updated my system via the GUI to today 1250. The router did restart properly! and seems to work normally.

##### #4 - 10/05/2020 01:46 PM - Jim Pingle

- Status changed from Feedback to Resolved
