

pfSense - Bug #11109

WebGUI RADIUS authentication doesn't work if WAN is down

11/27/2020 12:09 AM - Viktor Gurov

Status:	Resolved	Start date:	11/27/2020
Priority:	Normal	Due date:	
Assignee:	Viktor Gurov	% Done:	100%
Category:	Authentication	Estimated time:	0.00 hour
Target version:	2.5.0	Affected Version:	2.4.5-p1
Plus Target Version:		Affected Architecture:	
Release Notes:	Default		

Description

The GUI login screen works as intended, then if you use a local (not RADIUS) credential with no WAN IP configured it will not fall back. Instead it will show this error:

```
Fatal error: Error converting Address in /usr/local/share/pear/Auth/RADIUS.php on line 218 PHP ERROR: Type: 1, File: /usr/local/share/pear/Auth/RADIUS.php, Line: 218, Message: Error converting Address
```

Fix:

https://gitlab.netgate.com/pfSense/pfSense/-/merge_requests/68

#2 - 11/27/2020 01:25 PM - Max Leighton

I am able to reproduce this in

2.5.0-DEVELOPMENT (amd64)
built on Fri Nov 27 07:03:36 EST 2020
FreeBSD 12.2-STABLE

[27-Nov-2020 13:17:10 America/Chicago] PHP Fatal error: Error converting Address in /usr/local/share/pear/Auth/RADIUS.php on line 218

In my case, just downing the interface wasn't enough, I had to have the IPv4 configuration type set to None.

#3 - 11/30/2020 08:33 AM - Jim Pingle

- Status changed from New to Pull Request Review

- Target version set to 2.5.0

#4 - 11/30/2020 09:55 AM - Renato Botelho

- Status changed from Pull Request Review to Feedback

- Assignee set to Viktor Gurov

PR has been merged. Thanks!

#5 - 11/30/2020 10:00 AM - Viktor Gurov

- % Done changed from 0 to 100

Applied in changeset [5bd66059e975a7aad6c587bf6b9f808b2658a91d](#).

#6 - 12/03/2020 07:15 AM - Danilo Zrenjanin

- Status changed from Feedback to Resolved

Tested on :

```
2.5.0-DEVELOPMENT (amd64)
built on Mon Nov 30 07:00:43 EST 2020
FreeBSD 12.2-STABLE
```

It works fine now. Ticket resolved.
