

pfSense Packages - Bug #11191

Installing and Removing pfBlockerNG Leaves Shell Scripts in webConfigurator Messages

12/26/2020 05:41 PM - Kris Phillips

Status:	Resolved	Start date:	12/26/2020
Priority:	Normal	Due date:	
Assignee:	Viktor Gurov	% Done:	0%
Category:	pfBlockerNG	Estimated time:	0.00 hour
Target version:			
Affected Version:		Affected Architecture:	All

Description

On reboot after installing and then uninstalling pfBlockerNG, a few shell scripts remain in the shutdown/reboot message in the webConfigurator. These scripts also still exist.

```
Stopping package AWS VPC Wizard...done.  
Stopping package IPsec Profile Wizard...done.  
Stopping package OpenVPN Client Export Utility...done.  
Stopping package Service Watchdog...done.  
Stopping package System Patches...done.  
Stopping /usr/local/etc/rc.d/pfb_dnsbl.sh...done.  
Stopping /usr/local/etc/rc.d/pfb_filter.sh...done.
```

History

#1 - 12/26/2020 05:50 PM - Kris Phillips

Manually removing the two .sh files removes them from the UI, so it appears they are not cleaned up properly on uninstall.

#2 - 12/27/2020 10:45 AM - BBcan177 .

Before you uninstall, you need to uncheck "Keep Settings" in the General Tab.

#3 - 12/28/2020 08:54 AM - Jim Pingle

- Project changed from pfSense to pfSense Packages
- Category changed from Web Interface to pfBlockerNG

Is there a compelling reason to keep the shell scripts around even if the user didn't choose that? Typically a user would only expect "settings" to be kept (read: items in config.xml) and not files on the disk. But if there is a compelling case to keep them, it may be OK.

Ideally they should be cleaned up on uninstall, though.

it doesn't help

Fix:

<https://github.com/pfsense/FreeBSD-ports/pull/1013>

#5 - 02/05/2021 04:44 AM - Renato Botelho

- Status changed from New to Feedback

- Assignee set to Viktor Gurov

PR has been merged. Thanks!

#6 - 02/06/2021 05:19 PM - Kris Phillips

Verified that this is no longer a problem. Unchecking the save settings checkbox and then removing the package properly removes these scripts and the messages from the shutdown messages.
