Category:	pfBlockerNG		**Estimated time:**	0.00 hour
Target version:				

Description
Show IDN translated domains in addition to punnycode-encoded domains see screenshots

History

#1 - 12/31/2020 07:38 AM - Viktor Gurov

https://github.com/pfsense/FreeBSD-ports/pull/1015

#2 - 01/01/2021 01:59 PM - BBcan177 .

Best to edit the iTLD's and add the static IDN between the existing Puny code and the [xxx] counts.

```
(cc) XN--P1AI - (рф) [820,042]
```

All of the TLD Groups need to be updated more frequently to add/remove changes. Existing lists are over a year old.

I am still looking for a good TLD database source (including number of TLD's) that is free to use.

Maybe https://data.iana.org/TLD/tlds-alpha-by-domain.txt or https://publicsuffix.org/list/ ?

#4 - 01/02/2021 08:17 PM - BBcan177 .

Those don't provide a number of domains per TLD.

#5 - 02/05/2021 04:48 AM - Renato Botelho

- Status changed from New to Feedback

- Assignee set to Viktor Gurov

PR has been merged. Thanks!

#6 - 03/20/2021 11:10 AM - Danilo Zrenjanin

- Status changed from Feedback to Resolved

Tested on pfBlockerNG-devel 3.0.0_15 version.

It looks fine, the Total TLD Count is included and works as expected.

Ticket resolved.
