

pfSense Packages - Feature #11209

pfBlockerNG soft blocking

01/01/2021 08:21 AM - Viktor Gurov

Status:	New	Start date:	01/01/2021
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	pfBlockerNG	Estimated time:	0.00 hour
Target version:			
Description			
<p>For the high false-positive feeds, or for some specific feeds (like https://1984.sh/covid19-domains-feed.txt) it would be useful to use "soft blocking" mode,- Instead of being blocked, the user is simply redirected to the pfBlockerNG warning page with a link, i.e.:</p>			
<pre>"WARNING: The URI http://example.com/test is included in the XXX feed. Click the link to continue." "</pre>			

History

This won't work for HTTPS requests. And no way to do a redirection unless a Proxy is used.
