Description

Hello
Sometimes it happened to me to put in down state a gateway that was part of a group of Gateways.
To do this, as the guide says, I need to edit the gateway, select the "Mark Gateway as Down" option, save and apply.
Is it possible to add an icon directly in the table that makes the steps to enable the "Mark Gateway as Down" option and then ask to apply?
At the moment there is only the icon to disable a gateway but this does not apply if it is part of a group.

Thanks
Ste
