

pfSense - Bug #11275

Certificate import of a signed certificate signing request is not offered

01/21/2021 06:57 AM - Martin Bartosch

Status:	Resolved	Start date:	01/21/2021

Target version:	2.5.0	Affected Version:	2.5.0
Plus Target Version:		Affected Architecture:	
Release Notes:	Default		

Description

Testing the current pfSense 2.5.0-DEVELOPMENT version I encountered a problem with the certificate manager. When requesting a certificate from an external CA, after exporting the CSR it is not possible to import the generated certificate.

Steps to reproduce:

- create certificate request
- export certificate request
- try to import generated certificate

The GUI does not display the input field for the certificate and (rightfully) complains that no certificate was supplied on update.
