Release Notes:	Default		

Description

<https://forum.netgate.com/topic/160450/crash-report>:

It crashed abruptly when trying to configure captive portal. Also the logo and background files keep missing in the config page (very minor issue) but can still see in the captive portal login page.

PHP Errors:

```

Captive Portal custom logo fix. Issue #11360

To be clear this is triggered when enabling the custom logo option and then not uploading a file. Or by not also uploading a background image.

Tested that patch against:

```
2.5.0-DEVELOPMENT (amd64)
built on Tue Feb 02 00:05:06 EST 2021
FreeBSD 12.2-STABLE
```

Looks good with that, I cannot trigger any errors.

The fact a logo/background file present is not indicated which is inconvenient, it's hard to test the first part of this. Just cosmetic though.
