

pfSense - Bug #11401

Upgrade broken due to need to reinstall pkg

02/11/2021 10:52 AM - Renato Botelho

Status:	Resolved	Start date:	02/11/2021
Priority:	Urgent	Due date:	
Assignee:	Renato Botelho	% Done:	0%
Category:	Upgrade	Estimated time:	0.00 hour
Target version:	2.5.0	Affected Version:	All
Plus Target Version:		Affected Architecture:	
Release Notes:	Default		

Description

Sometimes, without any good reason, pkg doesn't download itself when running `pkg upgrade -F` but then, when final `pkg upgrade` runs it decides it needs to reinstall itself. When it happens during boot in the middle of upgrade process, it breaks upgrade because there is no network configured to download it.

We need to change pfSense-upgrade to always download pkg just to be sure it will be available when it's needed.
