

pfSense - Regression #11455

The ipsec configuration migrated from 2.4.x to 2.5 fails in certain cases.

02/18/2021 06:37 PM - oscar sacristan

Status:	Not a Bug	Start date:	02/18/2021
Priority:	Normal	Due date:	
Assignee:	Jim Pingle	% Done:	0%
Category:	IPsec	Estimated time:	0.00 hour
Target version:		Affected Version:	
Plus Target Version:		Affected Architecture:	
Release Notes:			
Description An ipsec configuration with version 2.4.x that contains these values <rekey_time>0</rekey_time> <reauth_time>0</reauth_time> When upgrading to 2.5 it keeps the same values These values fail in 2.5 The correct values apparently in 2.5 would be <rekey_time></rekey_time> <reauth_time></reauth_time> 0 does not seem to be allowed in 2.5.			

History

#1 - 02/20/2021 04:23 PM - Jim Pingle

- Tracker changed from Bug to Regression
- Status changed from New to Not a Bug
- Assignee set to Jim Pingle

There is no problem with having 0 for those. It will still work properly and assume sane defaults as if they are blank.

I tested several tunnels here manually forced with both values at 0 and they worked fine.
