Description

Page: https://docs.netgate.com/pfsense/en/latest/services/dhcp/ipv4.html

Feedback:

For "Failover Peer IP", add a note or warning stating:
When "Failover Peer IP" is configured in a High Availability setup, the failover node should be available when the service is started to allow lease pool information to be synchronized; failing this, the DHCPD service will not respond to DHCPDISOVER requests.

History

#1 - 05/09/2021 01:10 AM - Viktor Gurov
