

pfSense Plus - Bug #11673

Thermal Sensors Non-functional on SG-3100

03/13/2021 06:20 PM - Kris Phillips

Status:	Duplicate	Start date:	03/13/2021
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Dashboard	Estimated time:	0.00 hour
Target version:		Affected Architecture:	SG-3100
Release Notes:	Default		
Affected Plus Version:	21.02		

Description

The Dashboard Widget for the SG-3100 showing the thermal sensor information gets stuck on "Updating...." in pfSense Plus 21.02p1 and never proceeds forward with information on the device.

I was able to reproduce this on my SG-3100.

Unable to reproduce

Could be related to [#11443](#)

- Target version set to Plus-Next

I can reproduce it here even on a 21.02.2 snapshot. It's specific to the Thermal Sensors widget and not the temperature graph on the System Information widget.

Though since the 3100 only has the one sensor and it's in the system information widget, I'm not sure if the Thermal Sensors widget has any defined behavior for the 3100.

It could at least print a nicer message instead of being stuck at "(Updating...)" indefinitely.

Important to note that this seemed to work fine in the 2.4.5p1 images. Its just the newer release that has issues.

#5 - 04/17/2021 09:30 PM - Kris Phillips

This is still present on the SG-3100 for the 21.02.2 release.
