Description			
<p>There are some circumstances, that global sticky connections option isn't the best case. One of that is an internal Proxy on LAN, with a lot of traffic to one or two goals, that are bounded to one interface on sticky connections.</p> <p>Specifying the sticky type in gateway groups could work around that.</p>			

History

#1 - 01/23/2011 04:58 AM - Chris Buechler

- Subject changed from *Sticky Connections Rule based to gateway group based sticky connections*

Updated to a more feasible solution, per-rule isn't easily possible with the way it works.
