pfSense - Bug #1231

Upgrading pfSense Removed Internal CA

01/26/2011 02:22 PM - Steve Vigneau

Status:	Resolved	**Start date:**	01/26/2011
Priority:	High	**Due date:**	
Assignee:		**% Done:**	100%
Category:	Package System	**Estimated time:**	0.00 hour
Target version:	2.0		
Affected Version:	2.0	**Affected Architecture:**	All

Description

Updated from a version of pfSense from early today to the latest version (2.0-BETA5 (i386) built on Wed Jan 26 10:45:46 EST 2011) and my CA tab is now blank with the internal CA missing. All certificates are now listed as *External* issuer where they had previously listed the internal CA.

Restoring from a backup config taken just before the upgrade put the internal CA back and things are once again working as expected.

Associated revisions

Revision fc05822b - 01/27/2011 04:54 PM - Jim Pingle

Don't pass these by reference. Might be related to ticket #1231

Revision 5289dc57 - 02/01/2011 02:36 PM - Jim Pingle

Do not use references here when building a ca_chain_array. Really fixes #1231 - CAs are no longer lost when a config write happens at bootup.

History

#1 - 01/26/2011 02:30 PM - Jim Pingle

- Category changed from Upgrade to Package System

- Target version set to 2.0

- Affected Architecture All added

- Affected Architecture deleted ()

We've been trying to track that down for a bit.

See this thread:
http://forum.pfsense.org/index.php/topic.32372.0.html

Seems to be related to package removal, though it still isn't clear how or why it only affects certain people/configurations. Follow along the thread and post info there.

#2 - 01/29/2011 05:25 PM - Jim Pingle

- Status changed from New to Feedback

There have been a couple positive reports that some commits I made last week may have solved this. I'll leave it in 'feedback' state for a while to see if more reports surface one way or the other.

#3 - 02/01/2011 02:35 PM - Jim Pingle

- % Done changed from 0 to 100

Applied in changeset [5289dc575b0ed5a8d3c1ca556442cf57525d3fb5](#).

#4 - 02/03/2011 08:13 AM - Jim Pingle

- Status changed from Feedback to Resolved   *2/2*

Several people on the forum who could reproduce this before are no longer losing their CA. Looks like it's fixed.
