

pfSense - Bug #1265

config.console asks for WAN & LAN but displays LAN & WAN

Description

Very small bug, but, hey... we want a perfect system, aren't we ? :)

On the very first configuration (first boot on console), pfSense ask for WAN, and LAN configuration. But on configuration, it displays LAN, and WAN... It confuses some users (at least one on mine).

Here is a patch :

```
