Description

There is a typo on line 253 of /usr/local/pkg/snort/snort_generate_conf. This can result in the creation of an invalid snort.conf parameter value for 'max_file_size'.

Here is Line 253 with the error (a period instead of comma in config_get_path() function):

```
if (config_get_path('installedpackages/snortglobal/stats_log_limit_size'. '0') != '0')
```
