Description

Would be great to have an option in the GUI, to send notifications to an XMPP account. Then you can receive messages in Google Talk, iChat, mobiles, mail etc. It would also be very useful if you could register multiple recipients. Maybe much like the e-mail alerts feature? http://redmine.pfsense.org/issues/58

"sendxmpp is a perl-script to send xmpp (jabber), similar to what mail(1) does for mail."
http://sendxmpp.platon.sk

History

#1 - 03/29/2011 04:23 PM - Chris Buechler

- Target version deleted (2.1)

#2 - 10/21/2020 06:47 AM - Renato Botelho

- Status changed from New to Rejected

Things changes in the last 9 years and XMPP is not that relevant anymore. We have Telegram notifications
