Target version:	Affected Version: 2.0
Plus Target Version:	Affected Architecture:
Release Notes:	

Description

Regarding this thread(<http://forum.pfsense.org/index.php/topic.34135.0.html>) racoon needs to be patched to allow XAuth correctly.

Possibly need a decision if it will make it 2.0 or not!?

History

#1 - 07/28/2011 05:03 PM - Ermal Luçi

- Status changed from New to Feedback

There has been merged a setting for allowing LDAP as backend to be configured.
Not sure it should be merged in 2.0.

#2 - 08/04/2011 09:54 AM - Dries Trybou

Lastly I ran into the same issue, according to the post of jimp support for IPsec xauth is not going to happen until 2.1
Got it working in some kind of hackish way, probably it shall not survive a update to 2.0 final though :)

Actually you are referring to the LDAP patch, this ticket is for something else entirely. Yours is probably closer to ticket [#1112](#), which is for RADIUS, but the same applies to LDAP.

#4 - 08/04/2011 10:27 AM - Jim Pingle

And as of [5d6bade495483d81dee13b429b95867cd87c2236](#) the xauth+ldap bits are in 2.1 already, so it's already been merged in, so doesn't need a ticket.

#5 - 08/13/2011 11:19 PM - Chris Buechler

- Target version deleted (2.0)

#6 - 01/27/2012 06:36 PM - Ermal Luçi

- Status changed from Feedback to Closed

Follow-up on [#1112](#)
