Target version:	2.3		
Description			
it would be nice to have a possibility to set the radius me ip from the gui for the accounting also to diable the compression and encryption(pptp)

Revision f362c73b - 02/02/2016 12:24 AM - Chris Buechler

Use the NAS IP configured for PPPoE server instances. Ticket #185

History

#1 - 02/27/2012 10:35 AM - Jim Pingle

This seems to be half done on PPTP and the PPPoE server. There is a field for the NAS IP in both of those pages but I don't see that it's actually connected to anything in the backend code to put the value in mpd.conf

#2 - 02/02/2016 12:14 AM - Chris Buechler

- Subject changed from pptp/l2tp set radius me to PPPoE server 'set radius me'
- Category changed from Unknown to PPPoE Server
- Status changed from New to Resolved
- Target version set to 2.3

fixed PPPoE server to actually use the NAS IP field. PPTP's dead.
