Packet display in snort alerts

11/15/2011 08:49 PM - Dick Nixon

Status: Rejected	Start date: 11/15/2011
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category: Snort	Estimated time: 0.00 hour
Target version:	
Description Here's a quick hack to allow optional display of snort alerts packets. Default is to not display. A checkbox is provided to Show Packets. When the Save button is clicked then the code to display packet contents is activated and a column is added to the page. It overflows the page a bit depending on the theme page background. It only displays packets from the current run of snort. Previous alert packets are displayed as 'empty'. Also added a whois lookup from dnsstuff for the source and destination ip addresses.
