

pfSense - Bug #219

Reboot needed after Nic deletion (vlan parent).

12/14/2009 07:36 AM - Perry Mason

Status:	Closed	Start date:	12/14/2009
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Interfaces	Estimated time:	0.00 hour
Target version:	2.0	Affected Architecture:	
Affected Version:	2.0		

Description

If all nic's are VLAN nic's and the parent nic is added and then deleted right away (before a save) pfSense will hang.

Associated revisions

Revision 7850de1c - 12/23/2009 05:58 AM - Ermal Luçi

Ticket #219. Fix this for vlans and vips. Though it is a very rare case. The other clones are handled half way but should work ok.

Still happens. Tested with version Wed Dec 23 09:40:31 EST 2009

#5 - 12/27/2009 03:31 PM - Ermal Luçi

Actually a function name was wrong so please retry with newer versions.

#6 - 12/28/2009 03:26 AM - Perry Mason

No change with latest snapshot.

- Status changed from Feedback to Closed

I don't see it hanging, if that's the case it's NIC driver specific, but suspect it's related to [#471](#). Maybe Perry isn't seeing a hang at all, just the box dropping off the network for the reason specified there.
