#### Description

The rules negating policy routing for VPNs that exist in 1.2.x aren't added in 2.0.

#### History

##### #1 - 06/10/2009 11:18 AM - Ermal Luçi

The idea is to check the phase2 networks and check them with every rule we add if route-to is defined and the src/dst falls in any of these rules add a negating rules.

This can be done in kernel too but its too much overhead, so its better in the rules.

##### #2 - 07/07/2009 06:19 AM - Ermal Luçi

- Status changed from New to Resolved
- Assignee set to Ermal Luçi
- % Done changed from 0 to 50

Same behaviour as in 1.2.x is restored.

Code for having a more complete behaviour needs to be done.
