

pfSense - Bug #3277

GRE Tunnel CIDR drop-down is not limiting choices for IPv4

10/21/2013 07:31 AM - Jim Pingle

Status:	Resolved	Start date:	10/21/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Web Interface	Estimated time:	0.00 hour
Target version:	2.1.1	Release Notes:	Default
Affected Version:	2.1		
Affected Architecture:			

Description

On most screens (including the GIF interface configuration) when an IPv4 address is entered, the CIDR drop-down cuts the choices down to a max of 32. On the GRE configuration screen, it continues to allow the user to pick up to 128 when an IPv4 address is present in the "Remote Address" field.
