

pfSense - Todo #34

PPTP users integration with user manager

07/14/2009 04:48 PM - Chris Buechler

Status:	Needs Patch	Start date:	07/14/2009
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
PPTP users tab needs to go away and be integrated with user manager.			

History

#1 - 11/19/2009 03:33 PM - Jim Pingle

- Affected Version set to 2.0

The Radius server settings need to also be pulled from the User Manager authentication server setup as well.

#2 - 12/03/2009 12:33 AM - Scott Ullrich

IIRC mpd passwords are stored in plain text. This might be a challenge if not impossible.

#3 - 12/07/2009 06:41 PM - Scott Ullrich

- Target version changed from 2.0 to 3

#4 - 04/03/2010 06:24 PM - Chris Buechler

- Target version changed from 3 to Future

- Affected Version deleted (2.0)

#5 - 02/27/2012 10:23 AM - Jim Pingle

- Target version changed from Future to 2.1

Setting to 2.1, duplicated in [#1099](#) which had been updated to reflect that.

#6 - 02/27/2012 10:25 AM - Yehuda Katz

[#1099](#) (closed as a duplicate of this one) had a target of 2.1.

Is that still the case or is *Future* correct?

#7 - 02/27/2012 10:26 AM - Yehuda Katz

Looks like Jim changed it just as I was writing my comment. :\$

#8 - 07/17/2012 06:48 AM - Ermal Luçi

Probably 2.2-ish?

#9 - 10/26/2012 02:53 PM - Chris Buechler

- Target version changed from 2.1 to 2.2

#10 - 10/08/2014 12:43 AM - Chris Buechler

- Status changed from New to Needs Patch

- *Target version deleted (2.2)*

not worth the effort at this point, PPTP is dead.
