

pfSense - Bug #3437

web redirector doesn't listen on IPv6 port 80

02/06/2014 11:53 AM - Brian Candler

Status:	Resolved	Start date:	02/06/2014
Priority:	Very Low	Due date:	
Assignee:		% Done:	0%
Category:	Web Interface	Estimated time:	0.00 hour
Target version:	2.2	Affected Architecture:	
Affected Version:	2.1-IPv6		

Description

Minor issue: when you configure management to be HTTPS, the port 80 redirector only works on the IPv4 address and not the IPv6 address.

```
# netstat -finet -n -a | grep LISTEN
tcp4      0      0 *.80          *.*          LISTEN
tcp4      0      0 *.443        *.*          LISTEN
tcp4      0      0 *.53         *.*          LISTEN
tcp4      0      0 *.22         *.*          LISTEN
# netstat -finet6 -n -a | grep LISTEN
tcp6      0      0 *.443        *.*          LISTEN
tcp6      0      0 *.53         *.*          LISTEN
tcp6      0      0 *.22         *.*          LISTEN
#
```
