

pfSense - Todo #3734

Remove PHP static pear modules from repo and use ports

07/03/2014 01:15 PM - Jim Pingle

Status:	Resolved	Start date:	07/03/2014
Priority:	Normal	Due date:	
Assignee:	Renato Botelho	% Done:	100%
Category:	XMLRPC	Estimated time:	0.00 hour
Target version:	2.4.0		
Description			
The current XML_RPC code from PEAR in /etc/inc/xmlrpc_client.inc and /etc/inc/xmlrpc_server.inc is a bit behind. XML_RPC from PEAR (http://pear.php.net/package/XML_RPC) has been replaced by XML_RPC2 (http://pear.php.net/package/XML_RPC2), however it comes with some extra dependencies and potentially other required changes so it may not quite be a drop-in replacement.

Ticket #3734: Convert remaining xmlrpc_client.inc consumers to use XML_RPC2

Revision f81e7cc4 - 08/18/2016 02:42 PM - Renato Botelho

Ticket #3734: Convert xmlrpc.php to use XML/RPC2/Server.php

Revision 2355a762 - 08/18/2016 02:42 PM - Renato Botelho

Ticket #3734: Pass username on all xmlrpc calls

Revision 357b5e93 - 08/18/2016 02:42 PM - Renato Botelho

Ticket #3734: Remove xmlrpc.inc, xmlrpc_client.inc and xmlrpc_server.inc

Revision de645734 - 08/31/2016 06:48 AM - Renato Botelho

Ticket #3734: Add function to convert IPv6 address <-> binary

- ip6_to_bin() and bin_to_ip6() are copies obtained from pear-Net_IPv6 since the version available in the class is protected and we don't want to add more patches to third party software. If upstream accept to change them to public we can retire them
- bin_to_compressed_ip6 is just a short way to convert binary direct to a compressed IPv6 address

We have more PEAR components inside src, IMO the right way is to kill these copies and install them from FreeBSD ports.

Here is what we have on /etc/inc:

```
radius.inc (net/pear-Auth_RADIUS)
```

```
REMOVED - xmlrpc_client.inc / xmlrpc_server.inc (net/pear-XML_RPC or net/pear-XML_RPC2)
```

```
REMOVED - growl.class (pear-Net_Growl)
```

```
REMOVED - PEAR.inc (devel/pear)
```

```
REMOVED - CHAP.inc (security/pear-Crypt_CHAP)
```

```
REMOVED - IPv6.inc (net/pear-Net_IPv6)
```

```
REMOVED - smtp.inc (http://www.phpclasses.org/package/14-PHP-Sends-e-mail-messages-via-SMTP-protocol.html)
```

```
REMOVED - *_sasl_client.inc / sasl.inc (http://www.phpclasses.org/package/1888-PHP-Single-API-for-standard-authentication-mechanisms.html)
```

#3 - 01/06/2016 09:39 AM - Renato Botelho

- Target version changed from 2.3 to 2.4.0

Push it to next version so we can do it right, removing all static files and using packages provided from FreeBSD-ports

#4 - 08/10/2016 11:26 AM - Renato Botelho

- Subject changed from Update PEAR XML_RPC Client/Server to Remove PHP static pear modules from repo and use ports

#5 - 08/10/2016 11:28 AM - Renato Botelho

CHAP.inc removed in [6989a7c](#)

#6 - 08/12/2016 04:01 PM - Renato Botelho

- % Done changed from 0 to 80

#7 - 08/18/2016 02:55 PM - Renato Botelho

- % Done changed from 80 to 90

#8 - 12/20/2016 10:08 AM - Renato Botelho

- Status changed from New to Resolved

- % Done changed from 90 to 100

Moving radius.inc change to a new ticket ([#7024](#))
