

pfSense - Todo #3874

Make miniupnpd config syntax compatible with new versions

09/19/2014 10:55 AM - Renato Botelho

Status:	Resolved	Start date:	09/19/2014
Priority:	Normal	Due date:	
Assignee:	Renato Botelho	% Done:	100%
Category:	uPNP	Estimated time:	0.00 hour
Target version:	2.2		
Description			
After version 20140523, miniupnpd moved from warning to error the use of IP address for interface on config file, it throws following error			
<pre>Error: please specify LAN network interface by name instead of IPv4 address : 192.168.1.221/24 can't parse "192.168.1.221/24" as a valid interface name</pre>			
Need to make necessary adjustments to have it working with new versions			

Associated revisions

Revision 8718669c - 09/19/2014 02:53 PM - Renato Botelho

Recent versions of miniupnpd does not accept IPv4 address anymore, use interface name always. It fixes #3874
