pfSense - Bug #3937

Interfaces Dashboard Widget - Font to big and scaling wrong

10/15/2014 07:48 AM - David Williams

Status:	Resolved		**Start date:**	10/15/2014
Priority:	Normal		**Due date:**	
Assignee:	Renato Botelho		**% Done:**	100%
Category:	Dashboard		**Estimated time:**	0.00 hour
Target version:	2.2			
Affected Version:	2.2		**Affected Architecture:**	

Description

The changes in this commit (https://github.com/pfsense/pfsense/commit/607e15dbdf942483154887fea278bf54c64ae6ce) have a negative affect in a couple of ways:

1 - A long IPv6 address causes the widget to expand beyond the alignment of the rest of the dashboard.

2 - The font is larger that any other dashboard widget.

If the changes in this commit are reversed, the widget appears normally.

Screenshot attached.

Revision 0a8d7fe9 - 10/28/2014 06:49 AM - Renato Botelho

Back to use listr instead of vncellt since it has small fonts and mitigate changes of go outside the sidget. It should fix #3937

- *Description updated*

What is the operating system, browser and pfSense version you are using? I couldn't replicate the problem here.

#2 - 10/20/2014 10:50 AM - David Williams

2.2-BETA (amd64)
built on Sun Oct 19

Have tried it with:

Windows7 with Firefox (33.0 and prior)

Mac OSX with Firefox and Chrome

... all show the same.

- *File Interfaces-widget-22.png added*

I have attached a screen shot of what the Interfaces widget looks like on a 2.2 system with a long IPv6 address. Regardless of the address length, the font used for the whole widget is much larger than for the other widgets (e.g. System Information that is also in the screen shot). So the Interfaces widget looks inconsistent with the rest of the dashboard.
I used Firefox 33.0 for this.

- File Interfaces-widget-22-Opera.png added

I tried on Opera 25.0.1614.50 and somehow Opera fits it in better, but still the font size of stuff in the Interfaces widget is bigger than other widgets.

#7 - 10/28/2014 07:48 AM - David Williams

- File interface widget mod_a.jpg added

That change is an improvement and keeps the widget from being pushed off the side of the dash.

Call it a personal preference, but I like the design elements of the 2.1 widget better. Attached screen shows both. Your call.
