

pfSense - Bug #3964

Web interface fails to load on first boot

10/28/2014 12:08 AM - Chris Buechler

Status:	Resolved	Start date:	10/28/2014
Priority:	Very High	Due date:	
Assignee:	Renato Botelho	% Done:	100%
Category:	Web Interface	Estimated time:	0.00 hour
Target version:	2.2	Affected Architecture:	
Affected Version:	2.2		

Description

cert.pem file is missing on first boot of clean 2.2 nano install, which leaves the web interface dead.

```
[2.2-BETA] [root@pfSense.localdomain]/root: lighttpd -f /var/etc/lighty-webConfigurator.conf
2014-10-28 05:03:45: (network.c.549) SSL: couldn't read X509 certificate from '/var/etc/cert.pem'
```

Reboot the system, and it works fine.
