pfSense - Feature #4176

Add support for SMTP authentication mechanisms

01/04/2015 07:24 AM - Russell Morris

Status:	Resolved		**Start date:**	01/04/2015
Priority:	Normal		**Due date:**	
Assignee:	Renato Botelho		**% Done:**	100%
Category:	Notifications		**Estimated time:**	0.00 hour
Target version:	2.2.1			
Plus Target Version:			**Release Notes:**	Default

Description
This may apply to more than Office365 mail, but it does impact this mail system for sure. Details (and the fix) are at this link https://forum.pfsense.org/index.php?topic=72015.new;topicseen#new. The issue overall is allowing support for email systems that require SMTP Authentication using LOGIN, not PLAIN (as is the default / hard coded now). Perhaps just add a pull-down, to select LOGIN or PLAIN, and then apply this? Thanks!

History

#1 - 01/04/2015 10:34 AM - Phillip Davis

Proposed implementation of this: https://github.com/pfsense/pfsense/pull/1421
It works for me on a mail server that accepts both PLAIN and LOGIN.
Does this make it work for you on Office365?

#2 - 01/04/2015 06:32 PM - Jim Thompson

I'm not sure how to test this. (I don't want an Office365 Mail account.)

#3 - 01/05/2015 09:20 AM - Phillip Davis

Confirmed that pull request 1421 code is working for the user in forum: https://forum.pfsense.org/index.php?topic=86226.msg473100#msg473100

#4 - 01/06/2015 08:34 AM - Renato Botelho

- Project changed from pfSense Packages to pfSense

- Subject changed from Support for Office365 Mail to Add support for SMTP authentication mechanisms

- Category set to Notifications

- Assignee set to Renato Botelho

- Target version changed from 2.2 to 2.2.1

Provide a better description and move it to future since we are in RC

#5 - 01/06/2015 08:42 AM - Russell Morris

Hi,

Not a huge issue, just trying to understand - so this won't be included in the near future? Only asking because my email notifications are completely broken (and the same for other folks it seems), and the fix is pretty minor.

Thanks!

#6 - 01/06/2015 09:43 AM - Renato Botelho

I targeted it to 2.2.1, it'll be committed to RELENG_2_2 after 2.2 is released, and a gitsync will bring it to 2.2. I understand it's not a big patch but we need to stop adding new things to get the 2.2 release done.

While it doesn't happen, you can install 'System Patches' package on your system and apply the patch proposed using the URL
https://github.com/pfsense/pfsense/pull/1421.diff
