

pfSense - Bug #4427

Traffic Shaper Wizard still having issues

02/14/2015 06:39 PM - Marco Novielli

Status:	Resolved	Start date:	02/14/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Traffic Shaper (ALTO)	Estimated time:	0.00 hour
Target version:	2.2.1	Affected Version:	2.2
Plus Target Version:		Affected Architecture:	
Release Notes:	Default		

Description

I just upgraded to the latest 2.2 snapshot from Feb 13 in hopes of getting past the already documented traffic shaping wizard issues.

Although the wizard now completes (used to complain about Custom Bandwidths are greater than 30%), no floating rules are created upon completion. Confirmed with both CBQ and HSFC.

I am enabling is prioritization of VOIP, and setting the upstream SIP server using an alias. I'm setting the connection speed at 30 mbits down , and 10 mbits up; then setting bandwidth guarantee to 300 kbits for VOIP. No issues doing this on 2.1.5.

Using: 2G 64 bit NanoBSD + VGA (Feb 13 snapshot)
