<b>Target version:</b>	2.2.3		
<b>Description</b>			
An implementation of this feature is present at <a href="https://forum.pfsense.org/index.php?topic=90753.msg510914#msg510914">https://forum.pfsense.org/index.php?topic=90753.msg510914#msg510914</a>			
By a quick look the proposed implementation is ok though to be tested. pfSense already does EAP-Radius using the php script for authentication as before just the accounting part is the added value.
