

pfSense - Bug #4636

System - Firmware - Updater Settings - Firmware Branch behaviour is still completely braindead

04/18/2015 01:55 PM - Kill Bill

Status:	Closed	Start date:	04/18/2015
Priority:	Normal	Due date:

Target version:		Affected Architecture:	All
Affected Version:			

Description

When I select something from the "Default Auto Update URLs" dropdown, the "Use an **unofficial** server for firmware upgrades" gets checked and filled with the **official** server URL. When I uncheck it, I have no idea what's set -- managed to cross-arch several boxes multiple times like this.) I really don't know what's wrong with showing the currently selected option in the dropdown, instead of leaving it empty. The "unofficial" input should be reserved for what the description says, instead of confusing users.

History

#1 - 11/11/2015 12:35 AM - Chris Buechler

- Category changed from Web Interface to Upgrade
- Status changed from New to Closed
- Affected Version deleted (All)

this will be addressed in 2.3 as part of [#5414](#), as the fields in question go away.
