

## pfSense - Feature #4647

### Services: DHCP server should default to LAN, not WAN

04/21/2015 05:59 PM - David Gessel

<b>Status:</b>	Resolved	<b>Start date:</b>	04/21/2015
<b>Priority:</b>	Very Low	<b>Due date:</b>	
<b>Assignee:</b>	Chris Buechler	<b>% Done:</b>	0%
<b>Category:</b>	Web Interface	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	2.3		
<b>Description</b>			
When you click on Services-DHCP Server the first tab to open is the WAN tab, where you're very unlikely to be serving DHCP. Almost everyone then has to click on the LAN tab to go about configuring the DHCP server.			
Why not default to LAN and if you really want to serve on the WAN, then you have to click.			

#### History

##### #1 - 02/04/2016 05:32 PM - Chris Buechler

- Status changed from New to Needs Patch

it defaults to the first static IP interface, which for most is LAN. Defaulting to the first interface with an enabled DHCP server instance would be fine if someone would like to submit a pull request.

##### #2 - 02/08/2016 09:29 AM - Phillip Davis

This has annoyed me also, and Chris bumping it here reminded me about it. For a suggested solution see <https://github.com/pfsense/pfsense/pull/2602>

##### #3 - 02/08/2016 03:38 PM - Chris Buechler

- Status changed from Needs Patch to Assigned

- Assignee set to Chris Buechler

- Target version set to 2.3

thanks Phil! PR looks fine at a glance, I'll test and merge when I get a chance sometime today.

##### #4 - 02/11/2016 12:39 AM - Chris Buechler

- Status changed from Assigned to Resolved

all good

##### #5 - 02/11/2016 06:51 AM - David Gessel

:-) Thank you!
