

pfSense - Bug #4658

Quick/easy install fails with gmirror and SATA disks

04/27/2015 06:59 PM - Chris Buechler

Status:	Resolved	Start date:	04/27/2015
Priority:	High	Due date:	
Assignee:	Renato Botelho	% Done:	100%
Category:	Installer	Estimated time:	0.00 hour
Target version:	2.2.3	Affected Architecture:	
Affected Version:	2.2.2		

Description

Where you have a system with SATA disks, setup a GEOM mirror with them, and then try to do the quick/easy install, it will fail by trying to use ada0s1 rather than the mirror's s1. For instance:

```
-<<< Executing '/sbin/bsdlabel -B -r -w ada0s1 auto'
```

To replicate, boot a VM with two SATA disks, setup a GEOM mirror, then hit the quick/easy install. Thinking this regressed at da90fa1e915dd3b897e6da30353b086635224efb in -tools but have not verified that.

History

Could you send me /tmp/installer.log? I tried to reproduce it but couldn't

#2 - 04/28/2015 10:02 AM - Chris Buechler

- File *installer.log* added

installer log attached

#3 - 04/28/2015 10:21 AM - Renato Botelho

- Status changed from *Confirmed* to *Feedback*

- % Done changed from 0 to 100

I've pushed a patch to fix it, please confirm.

#4 - 04/28/2015 11:52 AM - Chris Buechler

- Status changed from *Feedback* to *Resolved*

fixed
