#### Description

There are three issues:

- The wrong domain was being used, domain instead of ddnsdomain.
- The option "deny client-updates" wasn't being set so forward entries weren't being added.
- No zone information was provided for reverse DNS.

I've submitted PR # 1634 with fixes.

Fix #4675

Following bugs and improvements on DHCPv6 DDNS area, obtained from PR #1638 from @Robert-Nelson:

- Use correct domain (ddnsdomain) instead of (domain)
- The option "deny client-updates" wasn't being set so forward entries weren't being added. Allow user to chose between allow, deny or ignore
- Implement reverse DNZ zone information (PTR)

#### History
