<b>Target version:</b>	2.2.3	<b>Affected Architecture:</b>	amd64
<b>Affected Version:</b>	2.2.2		

#### Description

After upgrading to 2.2.2 a crash occurs on CARP primary machines after syncing their config to the secondary. It appears that there is malformed XML that is sent back to the primary in response. pfSense forum user xanerol dumped the XML, found the likely culprit, and submitted a patch; see <https://forum.pfsense.org/index.php?topic=93225.msg518495#msg518495>

It appears the issue occurs in /etc/inc/unbound.inc. xanerol had trouble filing a redmine ticket so I'm doing it on their behalf.

#### History

##### #1 - 05/06/2015 07:30 AM - Ansley Barnes

Looks like a different manifestation of the issue fixed here:

<https://redmine.pfsense.org/projects/pfsense/repository/revisions/98615a3156d86aed1a560f109087d7e1ad4bf990>

Sorry for the dupe, looks like this can be closed.

##### #2 - 05/08/2015 04:10 PM - Chris Buechler

- Status changed from New to Resolved

- Target version set to 2.2.3

##### #3 - 08/21/2019 10:42 AM - Jim Pingle

- Category changed from 62 to XMLRPC
