

pfSense - Bug #4781

IPsec PSKs from user manager and vpn_ipsec_keys.php incorrect

06/21/2015 03:56 PM - Chris Buechler

Status:	Resolved	Start date:	06/21/2015
Priority:	Normal	Due date:	
Assignee:	Chris Buechler	% Done:	0%
Category:	IPsec	Estimated time:	0.00 hour
Target version:	2.2.3	Affected Architecture:	
Affected Version:	2.2.x		

Description

PSKs defined in the user manager and vpn_ipsec_keys.php result in:

```
no shared key found for '1.2.3.4'[1.2.3.4] - 'user@example.com'[4.3.2.1]
```

they're written out out to ipsec.secrets like:

```
%any user@example.com : PSK 0sDkeFJIEOeiruDfKlJdiruFJDJkefiuse
```

These must specify the identifier rather than %any to match.

commit coming momentarily. This restores the working behavior from change in [#4126](#).
