

pfSense - Bug #4795

IPsec logging is not working

06/27/2015 10:23 PM - Jorge Albarenque

Status: Not a Bug	Start date: 06/27/2015
Priority: High	Due date:
Assignee:	% Done: 0%
Category: Logging	Estimated time: 0.00 hour
Target version:	Affected Architecture:
Affected Version:	

Description

The IPsec logs stay blank even when setting all options to "highest".

I believe this is an issue on how the syslog is handled, since forcing strongSwan to log to a specific file works fine.

where is it not working, what's blank? It works fine in general.

#2 - 06/29/2015 09:07 PM - Jorge Albarenque

I apologize, my issue was not actually with IPsec logging. Syslog was not working at all, even across reboots, on two recently installed v2.2.3 systems. I had to manually empty the /var/log directory, and THEN use the "Reset all logs" option in order to get it to work again. Perhaps I was hit by some condition related to bug [4393](#)

Unfortunately I cannot reproduce it once fixed. I will try to reproduce it on a freshly installed system.

#3 - 06/30/2015 11:06 AM - Chris Buechler

- Status changed from Feedback to Not a Bug

- Target version deleted (2.2.4)

- Affected Version deleted (2.2.3)
