pfSense - Bug #4843

Traffic Shaper Wizard

07/15/2015 07:58 PM - Joshua Kafouros-Parker

Status:	Not a Bug		**Start date:**	07/15/2015
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Traffic Shaper (ALTQ)		**Estimated time:**	0.00 hour
Target version:				
Plus Target Version:			**Affected Version:**	
Release Notes:			**Affected Architecture:**	

Description

The traffic_shaper_wizard_multi_all.xml appears to be creating a qLink queue in the incorrect hierarchy for the Lan queue.
IE
~~LAN~~
~~-qLink~~
-(folder)qInternet
---qACK
---qP2P
---qGames
---qOthersHigh
---qOthersLow

Bandwidth is set on qInternet, and not set on LAN. The qLink queue is listed as the default queue and set to use 20% on the bandwidth.
This seems to cause issues with bandwidth allocation for the qLink queue

Expected behavior
~~LAN~~
-(folder)qInternet
---qLink
---qACK
---qP2P
---qGames
---qOthersHigh
---qOthersLow

On 2.2.3-RELEASE (amd64) AMD Athlon(tm) 5350

History

#1 - 03/28/2016 01:34 PM - Jim Thompson

- Assignee set to Chris Buechler

#2 - 07/08/2016 10:34 PM - Chris Buechler

- Status changed from New to Not a Bug

- Assignee deleted (Chris Buechler)

- Target version deleted (Future)

- Affected Version deleted (2.2.3)

the hierarchy is correct
