

Bootstrap - Bug #4942

missing javascript to adjust mask by IP version

08/17/2015 09:45 PM - Chris Buechler

Status:	Resolved	Start date:	08/17/2015
Priority:	Normal	Due date:	
Assignee:	Chris Buechler	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.50 hour
Description			
After entering an IP address in fields that accept IPs, javascript sets the mask values accordingly for that IP protocol (1-32 if IPv4 IP, 1-128 for IPv6 IP). That's gone missing with Bootstrap.

Chris,

This is supposed to still be the case. It worked on the pages I tried it with. Did you see this problem on a specific page?

#3 - 08/18/2015 03:46 PM - Chris Buechler

firewall_aliases_edit.php is where I noticed that's not working. It does work on firewall_rules_edit.php (though it doesn't auto-adjust to single host value as it used to, where switching to v6 it would default to /128).

- Status changed from Confirmed to Resolved

Resolved on firewall_aliases_edit.php.

Checking other pages by script
