DHCP Relay broken

08/18/2015 12:53 AM - Chris Buechler

Status:	Resolved	Start date:	08/18/2015
Priority:	Normal	Due date:	
Assignee:	Chris Buechler	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	2.00 hours
Description			
Enable DHCP relay, choose an interface, fill in a server IP and hit save. You end up with a 0 in the returned page for the server IP, and the following error spit out.			
<pre>Warning: explode() expects parameter 2 to be string, array given in /usr/local/www/services_dhcp_relay.php on line 109 Call Stack: 0.0001 234928 1. {main}() /usr/local/www/services_dhcp_relay.php:0 0.0264 1302944 2. explode() /usr/local/www/services_dhcp_relay.php:109 Warning: Invalid argument supplied for foreach() in /usr/local/www/services_dhcp_relay.php on line 110 Call Stack: 0.0001 234928 1. {main}() /usr/local/www/services_dhcp_relay.php:0</pre>			

History

#1 - 08/20/2015 04:18 PM - Steve Beaver

- Status changed from *Confirmed* to *Feedback*
- Assignee set to *Chris Buechler*

Programmer changes the server control to use an array of IPs but had not changed the config interface to understand that. A filter was needlessly introduced to remove any empty array elements, and this broke all but the first IP.
